

PHDC9610 : Integral Research Skills: Advanced Topics in Transpersonal Psychology 整合研究技能：超个人心理学高级课题

Students will learn to apply integral research skills derived from mindfulness practices (including working with intentions, quieting and slowing, direct knowing and intuition, focusing attention, auditory skills, visual skills, kinesthetic skills, proprioceptive skills, and accessing unconscious processes) to research. Students are expected to evaluate their own means of integral knowing and exploring applications of the skills with a selected research topic.
